New messaging service for business communication

– as handy as whatsapp

but all messages are safe within the secure MPG infrastructure.

Set up your Team(s)

3 months ago · Updated

Join available Teams or start your own Team (MPG employees only).

Join Teams available to you

After registration you can view a list with all Teams that are available for you to join, either on the screen directly after registration and on the sidebar (plus icon below the Team icons).

MPG employees will be offered to join the **MPG Team**, which features MPG-wide channels. Check out featured MPG Research Services with latest service information from the Max Planck Digital Library. You can also create private channels and invite members from the whole MPG community.

Create a new Team

Already charted your Team structure?
No? Read more about Organizing Minerva Messenger (link to published article)
Ready? Then go ahead, and create the initial relevant group and direct channels, invite members - and start collaborating.

Creating Teams

Managing Members
https://docs.mattermost.com/help/getting-started/managing-members.html

Inviting Members to your Team
Invite people to your team via a direct invite, a public team invite link, or if they already have an account on the server you can add them to the team yourself.

No need to use WhatsApp and Co. for professional chats.

With minerva messenger you have several benefits:

- Stay connected with your colleagues from the Max Planck Society and with invited externals.
- Write in different channels with different people or in private chats.
- Be assured that all chats are safe.

Enjoy ☺
